MELODY

Dear Iris Friends -

A new IRIS TIME has come, so quickly that we wonder what has happened to the winter, until we suddenly think, we HAVE moved and it Has been the busiest winter we've spent in many a long year.

Yes, I repeat, we have moved, please note our new address. We have realized for sometime in our growing, that "commercially" we have had the need of being in an area with a longer growing and working season. One that would enable us to give you even finer service than in the past, by being able to ship much earlier and far later than the season in Iowa permits. Henceforth we shall be able to fill, with our usual high quality stock, all of the orders that we were not able to handle in the past because of the shortness of the season.

If I may be permitted to dwell a bit upon our move, I would like to say that much thought as well as labor has been involved. A move always seems very sudden, even to the mover when it comes to actuality. However, it is far from that. Looking back, it seems to have taken endless time.

First, we wanted a place that would give a longer season, permitting earlier and later shipping as well as planting. A place where we could eliminate the weeks of work in the fall, covering the fields with tons of hay and the turnabout weeks of uncovering in the spring; but a place where the plants would go completely dormant and harden off in the winter as they do in the midwest. Last and not least we wanted a sandy, silty, loamlike soil such as we had in Sioux City. Sometimes it seemed like we wanted the impossible. However we began to look for such a place and during the winters of '51, '52, '53 and '54, our search took us over most of the southwest and the western coast as far north as the Canadian border. Finally it seemed as if we had found the place that was to us ideal and so in the spring of '55 we began our work with a definite move in mind. We selected, crossed, planted, discarded and arranged every move with that in mind. Extra crews and a rigorous shipping schedule gave us two free weeks early in the season during which time we returned west, looked over the selected area once more, acquired the approved site, prepared it for planting and made arrangements with Mr. and Mrs. DeForest to handle our shipments to the new place.

Fortunately for us, the DeForests, who have been our close friends for many years, are almost next door neighbors, so with them at one end and us at the other, the move took on a clockwork precision that was practically perfect. They planted numerous early shipments and even found time to have fields ready when we arrived later with the bulk of our stock. Now the iris have been planted for some time and appear to be happy in their new home, giving promise of plenty of bloom. In looking back we wonder how we could ever have done it without Fred and Caroline, for whose help we are deeply grateful.

We also wish to announce that we are maintaining our display gardens in Sioux City. We have retained a part of our stock there and will revamp and replant the fields there, and wish to take this opportunity to welcome visitors to the Sioux City gardens as usual and to also Welcome all visitors to the new gardens here in Oregon. However, please address all mail to our new address at Canby, Oregon.

We have added a large number of new varieties to our list, nearly all of which we have grown and tested, and we think you will find them as worthwhile as we have.

So many of you have inquired as to what progress we were making in lines of crosses previously mentioned in our Hybridizing Hints, that we would like to mention the following items at this time. Our recent results from previously mentioned breeding lines are, No. 55-185 which we feel is the first true red and white amoena. A 5th generation seedling from our crosses of the red bearded pinks with amoenas, this is a large,

beautifully formed flower with white standards and spectrum red falls with the color carrying smoothly into the throat and carrying fiery red beards. No. 54-84 which is from Bandit x Defiance, is in our estimation without a doubt the reddist iris in existence. Tall, well branched and with large flowers, it is several shades redder than even Defiance. Many have inquired as to what we were getting from our line of plicatas when worked with the Sass black and white plicata that bloomed without increase in 1950 and we are happy to say that we have achieved several new types from these crosses. Dark Halo is one of these and we have others with pure white grounds and accurate ribbonlike borders around both standards and falls from bright mid-blue to deepest purple or near black and some three or four with rich lemon grounds and near black borders. In mentioning plicatas I might add that Surrender is producing some fine ones with red beards. The pink into red lines have been more difficult though we have three very fine reds with brown red beards from the pod parent of Brigadoon crossed with Defiance x Apricot Supreme. These are not as yet the fiery red such the color that has cropped out in the falls of the above mentioned 55-185, but it does show that such reds are possible from this line of breeding. Plants of most of these may be seen in both our Iowa and Oregon gardens.

Most of you know how to reach the Sioux City gardens. The Oregon garden is just on the north edge of Canby, on Territorial road. To say a word about the location here, we like it very much and we think that those of you who can visit us will find it very interesting. To the east we have a perfect view of Mount Hood which we find never tiring and always awe inspiring. Closer at hand and just across the road to the north are the beautiful pansy and primrose fields of the Ellis Pansy farm and the colorful acres of Swan Island Dahlia gardens and we are looking forward to seeing the fields of Daffodils at the Grant Mitsch gardens very soon. The Beattie gardens are only a few blocks away and we are anxious to see their introduction Hermit Thrush and their much talked about new plicata which has our own Ebony Echo as a parent. Just to the west is DeForest's "Irisnoll" and needless to say we are waiting on "pins and needles" to see their new iris. We have had a sneak preview of some of them, such as the broad, allover ruffled, Grand Teton in its dress of Chartreus buttercup; the brilliant red Tall Chief that stood us right on end; Violet Hills which is the kind you "Can't hardly get some of no more"; Moon Fantasy with lace that makes other lacy ones look almost "Straight Laced" and others that appeared equally mouthwatering, but which we'd better let Fred and Caroline tell you about. We think that any of you visiting us in either locality will find much to see and we extend a hearty welcome to all.

In this forword, as in those of years past, we wish to say thanks to our many customers and friends for your consideration and patronage. We are looking forward to hearing from you and sharing the enjoyment of your iris and your gardening experiences once again. And to those of you who are receiving our catalogue for the first time, or growing iris for the first time, may we say "Welcome, glad to have you aboard". Please feel free to write to us about any gardening or Hybridizing problem you may have, we will be glad to help you to the extent of our ability.

In closing, may we say that we are very happy to know that you have found our stock to be so fine and that you are so well pleased with our selection of fine extras. We feel sure that we can now please you even more than before, and we hope too, that 1956 is the brightest and best ever, a real Banner year for all of you.

Sincerely,

Chet W. Tompkins

Our 1956 Introductions

1956 Personality Parade

\$2.00 Each Net

Another new season and we find last year's paraders have now moved into the ranks of the regulars, making way for this year's stars. We hope that you will welcome these warmly as they move "on stage," pushing aside the winter and late spring with its lovely Frosty Frills that gives way to Friendly Days and Pleasant Hours with Honey and Spice and Everything Nice.

FROSTY FRILLS (Tompkins 1956) E. L. 38 in. (Escapade x Chantilly) x Clara B. A large, well formed flower of creamy white with touches of glittering gilt on the haft and frost like lacy edge. The nicely formed and heavily subenced flowers are well placed on excellently branched, many budded stalks.

FRIENDLY DAYS (Tompkins 1956) M. L. 40 in. Chanconette x (Katherine Fay x Ave Marie). Here we have perfection of form and large size in a heavily subenced flower of shining orchid pink. A real beauty with strong, tall, well branched stalks and large clean foliage.

PLEASANT HOURS (Tompkins 1956) E. L. 48 in. ((Hit Parade x Apricot Supreme) x (Pink Tower x Apricot Supreme)). A very tall Iris with excellent branching, even a small clump of this makes a showy planting, as the branching begins low in the clump and all but the terminal branches are rebranched. The flowers are large, heavily subenced and of a rich deep pink infused apricot and brushed with gold at the hafts on each side of the bright red beard.

HONEY AND SPICE (Tompkins 1956) M. L. 36 in. Sib. to Rendezvous x (Balmung x Tiffanja). A massive and well formed plicata with good substance and broad rounded petals. The ground color is pale cream with a complete lacquer-like overlay of honey yellow. The standards are stippled and flecked with Cinnamon pink at their tips and the falls have an all over peppering of rich Cinnamon that is slightly heavier around the edges. A bright orange, cinnamon tipped beard adds to its spicy richness. Stalks are strong and well branched.

EVERYTHING NICE (Tompkins 1956) M. L. 36 in. Rio Valley x (Technicolor x Twilight Sky). One of our favorites, a large flower with the lovely form of Rio Valley, this has the same sleek finish and broad fluted petals. The color is a uniform shade of the deepest copper brown imaginable and is further heightened by a large flamelike signal of brilliant blue at the tip of the copper gold beard. A good grower, with strong well branched stalks, this seems to have everything nice that it needs.

BOLD PAGEANT (Tompkins 1952) M. L. 44 in. (Stardom x Arab Chief) x (Gypsy x Prairie Fire). A very large flower of rich, glowing Indian copper. A different color and a very showy iris.

BREAKAWAY (Dailey 1955) M. L. 40 in. (Ola Kala x Cloth of Gold) x (Rajah Brooke x Zantha). A gigantic flower with very broad round petals of heavy substance. The standards are golden yellow and the falls the same with a deeper overtone and a pattern of red veining.

DARK HALO (Tompkins 1956) M. 38 in. ((49-177A Starkist Sib. x Sass 50-96) x (49-177B Starkist Sib. x Sass 50-96)). Sass 50-96 is from a seedling from Blue Shimmer x ((M. Louis Aureau x (Tiffany Sib. x Amitola)) x ((Orloff x R. Coach) x (Siegfried x Tiffany Sib.)) x A Sib.)) Crossed with a seedling from ((Midwest Gem x Dore) x Prairie Sunset) x Flora Zenor) x (Aleppo Plains x (Imp. R. Pollock x Self). Dark Halo will be of special interest to those who attended the 1950 convention at Omaha and Sioux City. At that time Henry Sass had a new seedling plicata, No. 50-96, which had a cream ground and a very deep purple edge. It drew a great deal of attention and became known popularly as the Sass black plicata. As I had been working for some time to achieve plicatas with pure white petals and solid borders around both the standards as well as the falls I used pollen of this on varieties segregated for the purpose. When these crosses bloomed I found many interesting advances among them. Further crosses were made among these and in 1954 **Dark Halo** was selected from the lines of whites with dark borders. Dark Halo has a pure white ground with a faint breathlike hint of cream and a broad border around both the standards and falls of such a dark purple that even at a short distance it appears black. The flowers are quite large, of excellent form and finish and have extra heavy substance. A light ruffling adds much grace and charm while a full rich beard of the same color as the border rounds out the pattern. Our cover picture is an excellent likeness. Plants are hardy and the stalks are tall and well branched.

No. 54-108A. **35.00**

DEEP DEVOTION (Tompkins 1956) M. L. 38-40 in. (Cotton Candy x Apricot Supreme). For the past three years this has been a great favorite in our garden. Truly a stately Iris, it has tall, perfectly branched stalks with very large, exquisitely formed flowers. A self of clear orchid pink in which the orchid definitely predominates; it might best be termed a shade of light Bengal Rose. The flowers have very broad petals with accurately domed standards and perfectly held semi-flaring falls. A light, carnation like crimping on the edges of the petals adds to its beauty, and though a delicate color, it is deceptively rich and compelling and is further enhanced by a clear orange red beard. No. 53-161 H. C. 1954 **25.00**

DOWN BEAT (Tompkins 1956) E. M. L. 40 in. ((Campanula x Gulf Stream) x Columbia. A deep and very brilliant violet blue self of large size and excellent form with broad, heavily subenced and cleanly tailored petals. The hafts are smooth and clean with the rich color of the petals extending into the very center of the flower. One of the first to open, it blooms well into late midseason. A good grower with broad and very dark green foliage it produces strong stalks with wide branching and perfect placement of blooms. Down Beat quite often carries four open blooms at once and is a fine iris for the show room, and it has in our experience been an attention getter no matter where it has been planted. No. 53-192. H. C. 1955. **20.00**

FOLK SONG (Tompkins 1956) M. L. 38 in. Apricot Supreme x Muhlstein 49-21-50: (47-72A: Gold Ruffles x 45-64-1A: Alice Harding x Loomis "Type Dore"—A Sea Shell Sdlg.) x (Pink Formal). A large flower of very deep, rich pink with an almost completely hidden undertone of very pale apricot that seems to heighten the pink coloring; this is so different that it stood out very commandingly in a large bed of pink selections. Very large, with extremely broad petals and fine form, it has a silken finish and heavy substance. A fiery red beard still further heightens its color and a long season of bloom is another factor that is most welcome. A child of Apricot Supreme, it inherits its parents' tall, strong and excellently branched stalks. No. 53-187. H. C. 1955. **20.00**

TIMES SQUARE (Tompkins 1956) M. L. 36 in. Oriental Bazaar x Lady Albright). A lovely new bitoned blend, this is as bright and colorful as the place for which it is named. Excellently formed and of heavy substance, this iris has the large size and broad petals of its pod parent and the brilliant coloring of the pollen parent, intensified and clarified. The delicately ruffled and well domed standards are a clear, light golden copper and the broad, full formed falls are of brilliant copper red with an infusion of brown and a large central flush of bright violet blue. A full golden beard and a rich chocolate red haft accents its sharp coloring. A good grower, it has broad, clean, light colored foliage and strong, well branched stalks. No. 53-105. **25.00**

BRIGHT BROCADE (Tompkins 1952) M. L. 38 in. Lavender and Gold Lace x Matador. A bicolor blend with Tyrian gold standards and falls of rich petunia violet flushed red and gold. Lacy edged.

FANTASIA (Tompkins 1949) M. 38 in. Casa Morean x Grand Canyon. A very large flower of good form with very heavily substandard, broad ruffled petals. The coloring is in blended violet, purple rose and mulberry.

LUNAR MIST (Tompkins 1953) M. 36 in. (Congres x M. L. Aureau) x (Golden Hind x Wabash). From an oncobred and tall bearded line, this is a very lovely and most unusual iris. The flowers are very large and of a most unusual shade of greenish yellow or amber with a lavender blue flush over the falls. The blue flush is almost a powdered on overlay and a few near invisible stitchings and veinings are present on the falls. Heavy substance and smooth finish. Stock limited this year. **Net 1.00**

MANILA MOON (Tompkins 1952) M. VL. 38-42 in. Lamplit Hour x Pink Tower. Oyster white standards and chartreuse falls with an overlay of olive green. Different, lovely and fine for arrangements, this is a best seller and our stock is limited for this year.

CORSAGE (Watkins 1955) EM. 24 in. (K. Larmon x Ola Kala) x (Sib.). We are somewhat hesitant about advocating a season or height for this one. The introducer gives early to midseason and 24 inches whereas for the past two years in Sioux City it has been a mid-season to late bloomer and has been 36 to 38 inches in height. Nevertheless, early or late, short or tall, this is one we would not be without. There's certainly no other like it and we have found it truly delightful. Pure satiny white with splashes of brilliant yellow all through it. Truly almost Pixie painted, the splashes are applied in a happily haphazard and gay pattern and no two petals are ever alike. Hemerocallis

One of the most popular perennials of the day, the position of eminence the day lily holds is increasing steadily each season. The flowers range in size from the tiny two inch multiflora hybrids to the full-petaled giants having a spread of six to eight inches. Their finish varies in many ways. Some appear to be cut from velvet, others are satiny, some quite waxy appearing and some so infused with gold dust they appear to be of crystalline formation. They also vary in height, ranging from about eighteen inches to well over five feet. Through careful selection, you may have bloom in your garden from early June until frost.
